

Home Automation System Interface

**AUTOMATION** SYSTEM

# MaestroShield's Home Automation System Interface

MaestroShield's electronics put the beauty of your indoor shading, outdoor screening, and hurricane and security systems into motion. With the Home Automation System Interface, your MaestroShield Electronics can communicate directly with your home automation system, such as Control 4 and Crestron, increasing the flexibility of control for your system from a central control unit, over the internet or from a cell phone app.

## FEATURES

- The MaestroShield Universal RF-Interface is used to integrate third party home automation systems, such as Control 4 & Crestron, with MaestroShield's RF motors and receivers
- Operated via RS232 serial communication. After a RS232 input signal is received a RF signal will be sent to programmed devices
- Devices can be operated in groups or in single mode
- 24/7 Technical Support
- Produced under ISO 9001 Quality Guidelines
- Integrates with MaestroShield's full line of electronics for complete automation of your screen and awning systems, hurricane and security shutters, and interior shading.

MaestroShield® motors and electronics are innovation at its best. Designed in-house by Swedish and American engineers, these industry leading components are the perfect marriage of power, precision and integration. With multiple configurations available, the agility of our motors and electronics puts them in a class of their own. Designed and tested with quality in mind MaestroShield® motors and electronics will greatly enhance your shutter, door, screen and shading applications. These are only some of the reasons why MaestroShield® is superior to the competition in tubular motors and electronics.
