

Interior Shading Accessories

INNOVATIVE TECHNOLOGY

MaestroShield®
Protection Like No Other

Our innovation will change the way you think.

For too long motorized shading accessories have been plagued with bad design, poor quality and difficult installations. As modern entrepreneurs and master innovators, MaestroShield® understands the potential size and scope of the shading industry as well as the need to develop a better product that will be embraced and celebrated by all. In order to accomplish our goal, we brought together industry expert designers, installers, dealers and customers to understand the current problems with motorized shading systems. Once those problems were identified, our engineers got right to work creating solutions.

AUTOMATION | MaestroShield® motors and electronics are innovation at its best. Designed in-house by American and Swedish engineers, these industry leading components are the perfect marriage of power, precision and integration. With multiple configurations available, the agility of this system puts it in a class of its own. Designed and tested with quality in mind MaestroShield® motors and electronics will add convenience and movement to meet your shading and screening needs.

FEATURES:

- Aluminum Cast Side Caps, Hood and Brackets are Powder Coated
- Nylon Adjustable Plate & Adjustable Bar for ease of positioning and leveling after installation
- Nylon parts reduce friction and squeaking cause from plastic parts
- All Parts are interchangeable for reduced need of inventory
- Light gap less than 1/2"
- Bracket has finished end for a clean look without shading and a small lip to snap on extruded hood seamlessly
- Idle Bearing Cradle designed for industry leading motors
- Idle Bearing Sleeves fit Idle Bearings into various sized tubes.

MaestroShield® motors and electronics are innovation at its best. Designed in-house by Swedish and American engineers, these industry leading components are the perfect marriage of power, precision and integration. With multiple configurations available, the agility of our motors and electronics puts them in a class of their own. Designed and tested with quality in mind MaestroShield® motors and electronics will greatly enhance your shutter, door, screen and shading applications. These are only some of the reasons why MaestroShield® is superior to the competition in tubular motors and electronics.
