

POWER OF CONVENIENCE

MAESTRO-COMMANDER™ GSM

MAESTRO-COMMANDER GSM

The Maestro-Commander™ GSM is an exclusive product engineered and produced by MaestroShield®. The Commander puts remote power in the palm of your hands by allowing the ability to operate shutters, screens, blinds, garage doors and gates from a distance by simply sending a text message via your cellular phone.

This revolutionary product utilizes Global System for Mobile Communications (GSM) and Subscriber Identity Module (SIM) to transmit commands and execute functions in any component a mini receiver can attach to.

Should you be away from your home when the threat of a hurricane or storm is apparent, you will no longer have to hire a company or ask a friend to engage your automated hurricane protection system. You can simply send a text message to your Maestro-Commander™ GSM and Presto, the shutters are closed.

The Maestro-Commander™ GSM:

- Receives text message commands from your cell phone
- Executes the command received by relaying it to a mini receiver attached to the component
- Sends a confirmation message back when the command is executed

The Maestro-Commander™ GSM can be attached to:

- Hurricane shutters
- Security shutters
- Exterior roll down screens
- Exterior automated awnings
- Interior roll down shades
- Garage doors
- Gates

MaestroShield® motors and electronics are innovation at its best. Designed in-house by Swedish and American engineers, these industry leading components are the perfect marriage of power, precision and integration. With multiple configurations available, the agility of our motors and electronics puts them in a class of their own. Designed and tested with quality in mind MaestroShield® motors and electronics will greatly enhance your shutter, door, screen and shading applications. These are only some of the reasons why MaestroShield® is superior to the competition in tubular motors and electronics.
